Sub.B

A

M

1. (Amended) A device for wireless access of vehicle information from a vehicle incident recording system, the device comprising:

- at least one interface for accessing data from a remote vehicle incident recording system;
- an information datalink coupled to the at least one interface for receiving data from the remote vehicle incident recording system; and
- a transceiver coupled at least indirectly to the information datalink, the transceiver adapted to transmit data from the remote vehicle incident recording system to a secure location separate from the device, the device being adapted for mobile use.

2. (Amended) The device of claim 1 further including an information storage device.

A2

26. (Amended) The device of claim 1 wherein said transceiver provides a transmission link.

A3

28. (Amended) The device of claim 1 wherein said transceiver provides a transmission trigger for initiating transmission of information to an information storage device.

A4

34. (Amended) The device of claim 1 wherein the secure location is one or more of a hospital, a police station, and a fire station.
